

BIDUR SIWAKOTI

FUTURE TECHNOCRAT

Sunbarshi, Morang | siwakoti.bidur7745@gmail.com | <https://github.com/bidur7745>

Career Objective

Passionate about merging web development and AI/ML to build solutions that address real-world problems. With a strong foundation in full-stack technologies like the MERN stack and a growing skillset in machine learning, I aim to contribute to innovative, tech-driven teams while continuously learning and evolving in the dynamic field of intelligent systems.

Education

BSc (Hons) Computing	June 2023 - Present
Itahari International College	
London Metropolitan University	
Sundarharaicha - 4, Morang, Nepal	

School Leaving Certificate(SLC)	2019 - 2021
Sukuna Secondary School	
National Examinations Board(NEB)	
Sundarharaicha - 10, Morang, Nepal	

Skills

Technical skills	Soft skills
Languages: JavaScript, Java, Python Web Technologies: React.js, Node.js, Express.js, HTML, CSS, Tailwind Database: MongoDB, MySQL Tools: Git, GitHub, Postman,	- Problem Solving - Critical Thinking - Project Management - Time Management - Team Collaboration

Projects

Academic Projects
1. MCQpedia Nepal (Second Year Project – SYP) Language/Stack Used: MERN Stack (MongoDB, Express.js, React.js, Node.js) Description: A collaborative academic web app where students can practice MCQs, view subject-wise questions, and contribute new ones after logging in. Implements user authentication, secure CRUD operations, and responsive UI. Link to the Project: https://github.com/bidur7745/MCQpedia-Nepal.git
2. Vehicle Renting System Language/Stack Used: Java, Java EE (Servlets, JSP), JDBC, MySQL Description: A Java-based academic web application for managing vehicle rentals. Features include user registration, vehicle listings, booking system, admin management, and data persistence using MySQL. Link to the Project: https://github.com/bidur7745/Vehicle-rent.git

Personal Projects
3. SmartGov Bot (HackForNepal – E-Governance Category) Language/Stack Used: Python (Rasa Framework), HTML, CSS, JavaScript, Web Speech API Description: A smart chatbot system developed during the HackForNepal hackathon to improve accessibility to government services. Includes dynamic conversational flows, browser-based voice input/output (TTS/STT), and interactive form-filling using Rasa and custom actions. Link to the Project: https://github.com/bidur7745/SmartGov_bot.git

Additional Information

- Languages:** English, Nepali
- Career Goal:**To build a strong foundation in artificial intelligence and machine learning through an internship, and grow into a developer who builds intelligent, scalable, and user-friendly applications that solve real-world problems
